REPORT

## OMNI CHA NNEL 2023

Observing the strengthening trend of online shopping, we also see the intensification of competition in this field. We are wondering how to convince the customer to choose just our store? Maintaining the growth of market share is becoming more and more challenging, as not only the product itself and its price influence the purchase decision, but also all the accompanying circumstances. The entire customer experience along the purchase path, i.e. the presentation, convenience and security of the transaction, the return/exchange option, as well as the quality of post-sale support, affect the customer's perception and inclination to use or recommend a particular retailer again in their neighborhood.

Analysis of the omnichannel customer experience reveals a comprehensive picture of the challenges facing store owners in today's highly customer-centric environment. One of the key elements of such experiences is the need to ensure consistency and seamlessness between the various channels of customer interaction - both online and offline. Looking at the growing competition, everyone is wondering how to deliver the best possible shopping experience to their customers to build a lasting relationship with them and ensure their loyalty.

Because the OMNICHANNEL survey is produced periodically, we can compare results up to five years back and draw conclusions based on long-term trends. In addition, the survey is conducted on a large percentage of Polish Internet users, which allows for detailed in-depth analysis while maintaining the relevance of the results and large samples.

I would like to say a big thank you to our Partners and everyone who participated in the implementation of OMNICHANNEL2023. I hope that the collected results will help to better understand shoppers as well as encourage everyone to further develop Customer Experience programs that ultimately serve us all.

## Piotr Wojnarowicz

YourCX CEO

## METHODOLOGY RESEARCH

* Quantitative qualitative data collected anonymously and voluntarily, without gratification to respondents;
* Survey possible to participate and complete online only once;
* Survey target group corresponding to a crosssectional profile of Internet users in Poland;

Reach of over 2,600,000 consumers obtained

- through survey partners;

More than 250,000 completed surveys;
Multi-page survey consisting of cascading
*) questions, no mandatory questions, with demographic questions at the beginning;

Standardized question sets for each segment with

- a limit of 2 segments per survey;
- Common NPS methodology measure for offline and online shopping;
- Implementation of the survey: August-September 2023;

Selected e-commerce segments reflect the industries of YourCX's key projects;

* Survey partners: Pharmacy-Melissa, Audioteka, CCC, eobuwie, Leroy Merlin, Modivo, Multikino, Play, Sephora, Super-Pharm;
* The data presented in the report comes from the websites of the survey partners other than the industry partner;

The survey will be summarized in the form of separate reports for each industry analyzed;

## YOUR CUSTOMER EXPERIENCE INDEX

The purpose of the creation of the Your Customer Experience Index was to better differentiate companies with similar results and to identify real experience leaders.

Therefore, only extremely good experiences (rating sensationally) as well as very negative ones (dismally and poorly) are taken into account for the calculation of values. In the case of the NPS question, we have the assumption fulfilled by including promoters and detractors.

We treat all four indicators (product accessibility, ease of purchase, satisfaction with purchase, NPS) as equally important, so each of them has the same weight and has been scaled to a value in the range $[0,250]$, so that the final score has a value in the range [0, 1000].
intermediate value $=$ \%excellent - \%poor - \%fail
intermediate value NPS = NPS / 100
final value $=($ intermediate value +1$) * 125$
final score $=\Sigma$ final values

EXAMPLES OF CALCULATIONS FOR COMPANY XYZ

|  | fatally | poorly | so | good | excellentintermediate <br> value | final value |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Product availability | $11 \%$ | $2 \%$ | $40 \%$ | $30 \%$ | $18 \%$ | 0,06 | $\mathbf{1 3 2 , 5}$ |
| Ease of purchase | $5 \%$ | $9 \%$ | $15 \%$ | $49 \%$ | $22 \%$ | 0,08 | $\mathbf{1 3 5}$ |
| Satisfaction with <br> purchase | $1 \%$ | $3 \%$ | $28 \%$ | $31 \%$ | $37 \%$ | 0,33 | $\mathbf{1 6 6 , 2 5}$ |
| NPS $=40$ |  |  |  |  |  |  |  |

## WHAT PLATFORMS DO YOU USE WHEN BUYING MOVIES, BOOKS, MUSIC OR

 OTHER MEDIA ELECTRONICALLY?Multiple choice question

Almost half of respondents have a subscription to Nefflix, almost one in four use Spotify. $26 \%$ of respondents do not use any platform. We can tell by the distribution of responses that many people have more than one subscription. It is worth noting that the most popular Polish subscription is Empik Go.

## WHAT PLATFORMS DO YOU USE WHEN BUYING MOVIES, BOOKS, MUSIC OR OTHER MEDIA ELECTRONICALLY?

Comparison of total market shares with results from last year's survey

Comparing the Omnichannel 2023 results with last year's survey, we see declines in the share of indications for Netflix, HBO GO , or Player, and increases for Spotify, Empik Go, and Disney+. It is worth noting that one in four respondents does not use any platform, in which case we see a 7 p.p. increase from 2022

## WHAT PLATFORMS DO YOU USE WHEN BUYING MOVIES, BOOKS, MUSIC OR

 OTHER MEDIA ELECTRONICALLY?

Men were more likely to indicate that they do not use any platform and that they have a subscription to Amazon Prime (4 p.p. difference). Women are far more likely to say they use Netflix, Spotify and Empik Go.

## EXPERIENCE QUALITY INDICATORS

## YOUR CUSTOMER EXPERIENCE INDEX

Quality index on a scale of 0 to 1000 considering four satisfaction factors:
availability and breadth of offerings, ease of use of the platform, overall satisfaction with the purchase, and willingness to recommend the platform to friends

The quality index Your Customer Experience Index is designed to more easily differentiate between companies achieving similar results in subquestions, as well as to identify real quality leaders on a scale from 0 to 1000. As you can see, the undisputed leader is Spotify whose score is close to the value of 800 , despite the drop in value from 2022. The results of individual platforms from Poland oscillate around 600 - which shows that there is potentially still a lot of work to be done in the area of customer experience.

## HOW LIKELY ARE YOU TO RECOMMEND THESE SERVICES TO YOUR FRIENDS?

NPS index on a scale of - 100 to 100. Comparison with the distribution of responses in the previous edition of the survey

Invariably Spotify remains the leader, the highest value from Polish companies was achieved by Legimi. It is worth noting the 16-point drop in value for Disney+.

## EXPERIMENTAL QUALITY ASSESSMENTS

Quality ratings on a scale of 1 to 5 and NPS index on a scale of -100 to 100

Analyzing the various aspects of the experience against the NPS indicator, we observe the strength of the Spotify brand, where high ratings for the ease of use of the platform, but also for other experiences, correlate with a high likelihood of recommending the brand to friends.

## EXPERIMENTAL QUALITY ASSESSMENTS

Quality ratings on a scale of 1 to 5 and NPS index on a scale of -100 to 100 . Omnichannel 2023 with changes relative to 2022.

## WHAT DO YOU LIKE ABOUT PLAYING SPORTS?

Multiple choice question

## IS THAT ALL THAT THE STUDY WAS ABLE TO FIND OUT?

Definitely not! Only selected areas are covered in the report. On the other hand, throughout the survey we still addressed issues such as:

- Co-occurrence of brands chosen by respondents
- Reasons for not wanting to recommend particular brands
- Use of mobile applications of particular brands
- The influence of reviews and ratings on purchasing decisions
- Preferred payment methods

All results can be analyzed for any other question included in the survey, whether demographic (gender, age, education, full geographic analysis), preference or any other evaluation question.
Those interested in deeper analysis are welcome to visit our ocean of knowledge for mining these most valuable gems.

## SUMMARY OF THE STUDY

Survey conducted in August and September 2023

Cinemas

Telecommunicatic
Home and

More than 250,000 people completed the survey

We examined ten product segments
 garden

CONSUMER ELECTRONIC〔

Footwear

Books, multimedia

## Pharmacies

Subscription media (Streaming, VOD, Audiobooks).

# Those interested in additional analysis and research are welcome to contact and cooperate!
